

PERTH DEMO

19th October 2013

Start: 12.30pm, South Inch Car Park, Perth

Monitoring the sky for enemy intrusions is much harder since wind turbines create Radar Clutter

Industrial wind turbines create random blips on Radar screens making it harder to track domestic flights, military flights and unlawful intrusions into our skies. Wind Turbines are also being proposed near Eskdalemuir seismological recording station which will hamper the military and Government from being able to detect Nuclear Explosions in other countries

say **NO** to wind energy
