

PERTH DEMO

19th October 2013

Start: 12.30pm, South Inch Car Park, Perth

Components for Wind Turbines
creates industrial toxic pollution
in China.

Wind turbines use Neodymium as a replacement for gears. Neodymium is a Rare Earth Mineral extracted from deep underground and mixed with toxic chemicals. The waste is then dumped in a 5 mile toxic lake next to communities. Chinese residents are suffering from various illnesses and cancers, and farming is being wiped out due to the toxic levels.

say **NO** to wind energy
