

## APPEALS 2022

This document sets out the appeal decisions announced in **2022**. The refusals appear in blue. Not all the schemes are new schemes. Some are changes to consented schemes so it's quite difficult to calculate accurately how many **new** turbines have been consented by these decisions. Quite a few are for turbines of **149.9 metres**.

I have listed schemes under the methods used to decide them with a further list of those which were consented. Most were on smaller schemes with about half of those appeals being refused but all the 9 S36 schemes were approved – either after a PLI or as a determination when no objection was lodged by the planning authority.
