

APPEALS 2023

This document sets out the appeal decisions announced in **2023**. The refusals appear in blue. I have included **Overhill (2)** because the decision was announced in July 2023 although a notice of intention to allow the appeal appeared in 2022.

Not all schemes listed below are new ones. Some are changes to consented schemes so it's quite difficult to calculate accurately how many **new** turbines have been consented by these decisions. Quite a few of them are for turbines of **149.9 metres**.

I have listed schemes under the methods used to decide them with a further list of those which were consented. Unlike 2022 most decisions were on S36 schemes. The majority were approved – either after a PLI or as a determination when no objection was lodged by the planning authority – but 4 were refused.
